Code Review Worksheet

CPSC 491/491L/492L

Review Identification Information

      Date of Review: December 3, 2023

      Project Review is Part of: Medcurity

      Branch/PR Identifier: b440e449a76a0bf167bf3e8575969b0fee6aa485
                       351a55e69b7fed531cb8394e6c2c3e8a4348dfe3

      Code Reviewer(s): Colleen Lemak

      Code Author or Source of Code: Artis Nateephaisan

These following categories should be addressed, though not all might be applicable, it will depend upon the project and code at hand.

#1 Project, Milestone, Issues, Features Included, and/or Pull Request description
Week 14 progress addresses user-interface backlog tasks, implementing set up for initial pages. The first commit adds the login-button and index.html functionality, and the second commit adds a new asset-info tab and works on a tab link hover.

#2 Code Structural, Design Considerations, and Style Guide Suggestions
Easy code to read/follow through. I like the breakdown into HTML and CSS files to keep organized, good structure!

#3 Code Architectural and Efficiency Considerations
Runs efficiently, should be lightweight to spin up localhost/computer's server

#4 Execution, Runtime, and Bugs
Nothing to report—keep incrementally testing as you go 😊

#5 Documentation Quality and Completeness
No extensive documentation yet, good comments to label sections for reproducibility

#6 Testing, Tests, Coverage, and suggested testing improvements
No essential UI testing yet, just visually making sure pages redirect as expected.

#7 General Comments, Notes or Other Suggestions for Author

Good work this week—keep pushing for UI inputs/outputs. It'd be a great step/goal to get queries of dummy data or a general sense of manual input as well.

#8 Appendix - Include up to five pages of the code under review as a diff.
      See git diff or do a diff in VS code/IDE of choice
      Show what's being reviewed, code or otherwise (config files, scripts, docs, etc).
