Code Review Worksheet

CPSC 491/491L/492L

Review Identification Information

       Date of Review: 1 December 2023

       Project Review is Part of: CS-10 Network Inventory

       Branch/PR Identifier: PR-21, index.html

       Code Reviewer(s): Brandon

       Code Author or Source of Code: Jack

#1 Project, Milestone, Issues, Features Included, and/or Pull Request description
Initial homepage, connected pages, manual input bars, filter bar, save button ... for UI

#2 Code Structural, Design Considerations, and Style Guide Suggestions
Layout makes sense. Having the sidebar of options towards the top since it is kind of isolated from the rest is good. Footer at the bottom makes sense. Consistent indentation is very good. The use of color, general layout of page, and use of functions where appropriate are all good.

#3 Code Architectural and Efficiency Considerations
Keeping things as seperate "objects" and as their own parts as you seem to be doing is good. Code seems effecient in style and execution.

#4 Execution, Runtime, and Bugs
All good

#5 Documentation Quality and Completeness
Not much documentation—internal or external to file—but the small comments saying what each section of code is are very helpful!

#6 Testing, Tests, Coverage, and suggested testing improvements
No testing written in code, but there was obviously testing by opening the UI page while developing to see what was being done.

#7 General Comments, Notes or Other Suggestions for Author
None

#8 Appendix - Include up to five pages of the code under review as a diff.

Project-Version-0 / UI / index.html
